## **TECHNICAL DATASHEET of the "STUCCO MADREPERLATO WATERPROOF "**

- Description: stucco for interior decoration.
- Main Characteristics:
  - viscosity: its exceptional viscosity characteristics allow a very easy application.
  - waterproof: wall treated with this stucco can be cleaned with water and liquid soap

### **OTHER CHARACTERISTICS**

- Ready to use: no need to mix it with other products, not even to color it.
- Odorless: it can be applied in any season, even with closed windows.
- Fireproof: the product is based like our totally natural products on gypsum and water, with a minor content of synthetic resins to add the waterproof features. Our tests indicate that it is fully fireproof. We estimate that the "Nuovo Stucco Lucido Veneziano Waterproof" will be certified to comply with class 0 (maximum fire resistance).
- Working temperature: above 5°C..
- Tools: stainless steel triangular trowel. The tools size can be changed according to each application requirements ( 5, 8 or 10 cm).
- Tools Cleaning: plain water.
- Directions for Use: apply two coats of "Background for Waterproof" (see specific datasheet) waiting about one hour in between. Smooth with sandpaper n. 180 and remove the dust with a dry brush. Apply the " Stucco Madreperlato Waterproof" touching the wall with spots about 10 cm apart until about 1 sqm is covered. Go back to the beginning and touch more spots until the surface is completely covered. Once this part of the wall is fully done, clean the trowel and pass the surface to remove any stucco running. One coat is enough to create the special colour effects of the Stucco Madreperlato.
- Hints: apply in spots and remove the stucco completely leaving no thickness.
- Drying: 2/4 hours, depending on temperature and humidity.
- Colour: white and 28 calibrated colours: four shades each of Straw Yellow, Old Times Pink, Green, Light Blue, Tawny, Ivory, Gray. The final effect is similar to silk.
- Polishing process: the Stucco Madreperlato is "self-polishing" while it dries up; there is absolutely no need to polish it with the clean trowel or to apply special waxes.
- Repairable: in case of damages or wall cracks, the coat of "Stucco Madreperlato Waterproof" can be repaired.

*SAMA di Santon Marinella*

web site <http://samastucchi.it>

- Maintenance: for cleaning use only water and a mild liquid soap; wait at least three days from the application; don't use any type of alcoholic cleaning product.
- Yield: 20-24 sqm / liter.
- Manpower: 2 sqm/hour of finished wall.
- Shelf life: unlimited in a fresh room closed in the original container.

IMPORTANT NOTE

- no special tool or technique is required to remove the "Stucco Madreperlato Waterproof": 2 coats of standard paint are enough to cover the wall.
- never use alcohol to clean the walls treated with the "Stucco Madreperlato Waterproof".
